

LPS[®] System

LOW PROFILE STEP NOSE AND RACEWAY COMPONENTS

APPLICATION

Designed as part of a complete solution, the LPS system is available in solid gray or black with a 1" nominal contrasting gray stripe to help delineate the edge of walkways and aisles. The LPS Raceway, a low cost solution for both carpet trim and electrical cable routing, is designed to provide a clean transition from carpeted to uncarpeted areas on flat or sloped surfaces with the added functionality of providing a code compliant, low voltage wire way.

CONSTRUCTION

- Extruded vinyl profile in solid gray or black with a contrasting gray stripe (nominal 1")
- End caps are mechanically attached to the step nose for secure installation and durability
- Transitional components include LPS Step Reducer, Carpet Flap Extension and Carpet Edge
- Two distinct low-profile junction box designs
- Junction Boxes constructed of durable die-cast zinc
- Raceway for use with Class 2 power systems only

PERFORMANCE

- Solid gray or black with a contrasting gray stripe help visually identify the edge of steps
- Low profile design engineered to work with most popular low pile carpets
- Designed to handle step angles from 75° to 90°
- Durable, flexible vinyl extrusion conforms to uneven surfaces
- Eliminates potential hazards associated with hard PVC or aluminum extrusions
- Junction boxes designed to integrate seamlessly into a complete step and aisle lighting solution with other Tempo products

SUGGESTED COMPANION PRODUCTS

- SW3[®] Aisle, Step and Pathway Lighting
- Vanguard Illuminated Displays

WARRANTY
